EDUCATION

Tungal ind PU science college

PCMC pre university

Percentage: 89%

Vijayapura

2021 - 2023

RNS INSTITUTE OF TECHNOLOGY

CSE-Data Science B.E

CGPA: 8.25

Bengaluru

SKILLS

Programming Languages: Python, C
Libraries/Frameworks: Numpy, panda, Seaborn, scikit-learn
Tools / Platforms: VS code
Databases: SQL, MongoDB, DBMS

PROJECTS / OPEN-SOURCE

House Price Prediction using ML

Javascript,HTML/CSS

Developed a House Price Prediction system using the Random Forest algorithm to estimate property values based on features like BHK, facing direction, and parking availability. Introduced a novel feature to compare prices between two locations simultaneously, enabling better decision-making

SENTINAL- Multi Agent UPI fraud detection using GNN

Python,PyTorch,scikit-Learn

Developed a UPI fraud detection system using Graph Neural Networks (GNN) with a multi-agent architecture to identify suspicious transaction patterns. Leveraged graph-based relationships between users and transactions to improve fraud detection accuracy beyond traditional methods.

Bias Aware Resume Screening

Python ,scikit-learn,NLP,Numpy,Pandas

Developed a bias-aware resume screening system using NLP techniques to ensure fair and unbiased candidate evaluation. Incorporated fairness algorithms to detect and mitigate bias in hiring decisions, improving transparency and equity in the recruitment process.

CERTIFICATIONS

- Deloitte Technology Job Simulation - Deloitte.
- Deloitte Data Analytics - Deloitte.
- Algorithms for Searching, Sorting, and Indexing - University of Colorado Boulder.
- Cloud Computing - NPTEL [IIT KGP].
- Data Visualization: Empowering Business - TATA Group.
- Get Started with Looker - Google.
- Get Started with API Gateway - Google.
- Oracle Generative AI professional - ORACLE.
