

ANIRUDDH UMMARJI

Aspiring Data Scientist and Software Engineer

aniruddhummarji88@gmail.com • linkedin.com/in/aniruddh-ummarji-1b23aa2a7 • Bengaluru, India

Summary

I am an aspiring Data Scientist and Software Engineer with strong foundations in computer science and data analytics. My skills in programming and problem-solving enable me to contribute effectively to innovative, data-driven projects. I am keen on leveraging my skills in scalable solutions and eager to grow professionally in this dynamic field

Education

RNS Institute of Technology (RNSIT)
Bachelor of Engineering

Bengaluru
09/2023 - 07/2027

Tungal Independent PU Science College
Science

Vijaypur
06/2021 - 03/2023

Strengths

★ **Computer Science Fundamentals**
Strong foundation in computer science fundamentals and software engineering

✓ **Adaptability**
Quick learner with the ability to adopt new technologies

🔧 **Testing & Debugging**
Testing and debugging mindset with focus on comprehensive use cases

🔧 **Problem Solving**
Creative problem solver with excellent troubleshooting skills

🚩 **Cloud Scaling Concepts**
Exposure to cloud scaling concepts and open-source development

Key Achievements

♥ **House Price Prediction Project**
Developing a House Price Prediction ML model using Python and scikit-learn. Performed data cleaning, feature engineering, and exploratory data analysis, and trained regression models to estimate real-estate prices. Currently optimizing the model for improved accuracy and real-world usability.

Skills

GitHub • Python • SQL • C/C++ • MongoDB • Data Structures • Visual Studio Code • Pandas • Matplotlib • Data visualization • LLM • RAG model • Gen AI • Computer Network

Projects

House Price Prediction using Machine Learning

Developing a House Price Prediction ML model using Python and scikit-learn. Performed data cleaning, feature engineering, and exploratory data analysis, and trained regression models to estimate real-estate prices. Currently optimizing the model for improved accuracy and real-world usability.

- Prediction of house price
- The model can predict house prices based on important features, helping users estimate property value before buying or selling.
- Built a Machine Learning model to predict house prices using real estate datasets

Performed data preprocessing, feature scaling, and exploratory data analysis

Trained and compared multiple regression algorithms (Linear, Ridge, Random Forest)

Currently working on model performance improvement and deployment

Training / Courses

Generative AI by NVIDIA
